 **Meeting & Expo** 

September 21–25 2022

The Westin Denver Downtown Denver, CO

More than just CME!

Come to Denver & Enjoy!

Signed up for Denver so far

Top 10 Denver Facts

1. Denver is near the mountains, not in them.

There are 200 named peaks visible from Denver, including 32 that soar to 13,000 feet (4,000 meters) and above. The mountain panorama visible from Denver is 140 miles (225 km) long.

2. Denver really is exactly one mile high.

There is a step on the State Capitol Building that is exactly 5,280 feet (1,609 meters) above sea level. In Denver's rarified air, golf balls go 10 percent farther. So do cocktails. Alcoholic drinks pack more of a wallop than at sea level. The sun feels warmer in the thinner atmosphere, but your coffee is cooler because water boils at 202 degrees (94 degrees Celsius).

3. Denver has one of the most walkable downtowns in the nation.

Denver boasts the 10th largest downtown in America and one of the most exciting and walkable. Within a mile radius, downtown Denver has three major sports stadiums, the nation's second largest performing arts center, three colleges, an assortment of art and history museums, a mint that produces 10 billion coins a year, a river offering whitewater rafting, more than 11,000 hotel rooms within a short walking distance of the Colorado Convention Center (more than 50,000 first class hotel rooms in the greater metro area), a downtown theme and water park, downtown aquarium and hundreds of chef-driven restaurants.

4. Denver has 300 days of sunshine a year.

Located east of a major mountain range, Denver has a mild, dry and sunny climate with more annual hours of sun than San Diego or Miami Beach. In winter, Denver is dryer than Phoenix with an average daily high of 45 degrees (7 degrees Celsius) in February. Golf courses remain open all year and have been played every day in January.

5. Denver's history is short but colorful.

In 1858, there was not a single person living in the Denver metro area. Thirty years later, Colorado was a state with a population of almost 200,000. It was a gold rush that caused this boom, and in a 30-year period, Denver saw some of the wildest events in the Wild West. This fascinating period is relived in museums, old gold mining villages and hundreds of elegant Victorian buildings.

More Facts

6. Denver has one of the most unique city park systems in the nation.

Denver has more than 200 parks within the city and 20,000 acres of parks in the nearby mountains, including spectacular Red Rocks Park & Amphitheatre. The city has its own bison herd at Buffalo Herd Overlook. Other mountain parks include Echo Lake, at the base of the Mount Evans highway – the highest paved road in North America – and Buffalo Bill's Grave on top of Lookout Mountain.

7. Denver is a cultural city with a highly educated population.

In its Old West days, Denver had a performance of "Macbeth" before it had a school or hospital. Today, the Denver Performing Arts Complex has nine theaters seating 10,000 people. The seven county metro area has a self-imposed sales tax for the arts, which is distributed to 300 arts organizations and facilities. Denver's live music scene entertains year-round, ranging from intimate venues like the Paramount Theatre to legendary open-air spots like Red Rocks Park & Amphitheatre, where the Beatles, U2 and many more have played.

8. Denver is one of only a few cities to have six professional sports teams.

Denver loves its sports, from basketball to football to soccer to baseball. Denver also has horse racing and a professional rodeo. Denver has 90 golf courses, miles of bike paths and the nation's most unique city park system.

9. It's easy being "green" in Denver.

From global warming and renewable energy to environmental cleanup, Denver is emerging as a model for sustainable cities. The Colorado Convention Center is green through and through, including a rare LEED Gold certification for existing buildings and the Blue Bear Farm, which grows more than 5,000 pounds of fresh produce annually! Denver International Airport is dedicated to sustainable practices, including a Community Stewardship philosophy that includes energy and environmental management, green buildings and noise abatement. The Denver Zoo's Toyota Elephant Passage uses a biomass gasification system, which can turn human trash and animal waste into energy to power the exhibit. Plus, many of Denver's famous craft breweries are committed to recycling programs and responsible water usage.

10. Denver is farm-fresh.

Whether you're enjoying a night out on the town at one of Larimer Square's independently owned fine dining spots or digging into the offerings from one of the city's many gourmet food halls, you can count on fresh, local ingredients. The city's beer world is booming, too, with new craft breweries opening up, along with several distilleries and wineries, too!

SCHEDULE

For Wednesday

4 CME

TIME	EXPO	LECTURE	Product Theaters	PATHOLOGY
